### Effective Date:
January 1, 2020

### Background:
Employees in California are required to be paid the minimum wage as required by state law, with certain exemptions. The current California minimum wage is $12.00 per hour.

### Purpose:
To inform Eligibility and Employment Services staff of the increase in the statewide minimum wage and its impact on CalWORKs, CalFresh, General Relief (GR) Work Project assignment and credit, Employment Services (ES), and CalFresh Employment and Training (E&T).

### Policy:
The California minimum wage will increase to $13.00 per hour effective January 1, 2020.

Income is reasonably anticipated when the worker determines it is reasonably certain that the customer will receive a specified amount of income during any month of the payment period; this applies to both earned and unearned income.

Note: The California minimum wage for businesses with less than 26 employees will increase to $12.00 per hour effective January 1, 2020.

### Procedure:
**CalWORKs and CalFresh Programs:**
Employed individuals are expected to report income reflecting the minimum wage increase beginning January 2020 Data Month (SAR 7) or February 2020 redetermination/recertification (RRR), and workers will evaluate the reported income for the upcoming payment period. If unable to obtain clarification, the SAR 7 or RRR will be considered incomplete until all needed information or verification is submitted.

If the customer reports a pay increase prior to January 1, 2020, use current reporting regulations to determine when the change of income should be used in the budget. Additionally, clarify with the customer and request verification as necessary to determine if the income can be reasonably anticipated and budgeted in the upcoming payment period.

**ES:**
Employment Case Managers (ECMs) must perform the Simplified CalFresh Program (SCFP) Calculation to determine the maximum number of hours that a participant can be required to participate in a Work Experience (WEX) or Community Service (CS) assignment. ECMs must use the minimum wage of $12.00 when completing such a calculation through December 31, 2019.

**CalFresh:**
For WINS, if verification provided does not include the hours worked, divide the Work-Eligible Individual’s (WEI) wages by the State minimum wage plus fifty cents (State Minimum Wage + $0.50) to determine if they meet the hours requirement.

State and Federal Minimum wages are used in the following computations:
- CFAP Work Requirements
- Work Registration Requirements
• Voluntary Quit
• Student Eligibility Requirements
• WINS Eligibility
• E&T Work Requirement
• E&T Exemption Criteria
• Determination of Workfare Hours

**CalFresh E&T:**
For E&T, the number of Workfare hours assigned each month is determined by dividing the household’s CalFresh allotment by the Federal or State minimum wage, whichever is higher. Currently, the California minimum wage is higher*.

**GR Work Project:**
The Work Project assignments are determined by dividing the net grant by the Federal or State minimum wage, whichever is higher. The credit for Work Project completed is determined by multiplying the hours worked by the current Federal or State minimum wage, whichever is higher* Refer to Attachment A.

*Currently, the California minimum wage is higher than the Federal minimum wage, therefore CalFresh E&T Social Workers and GR workers must use the new California minimum wage for the number of Workfare hours/Work Projects assigned for January 2020 and ongoing.

**Program Impacts:**
None.
